

# Legend®

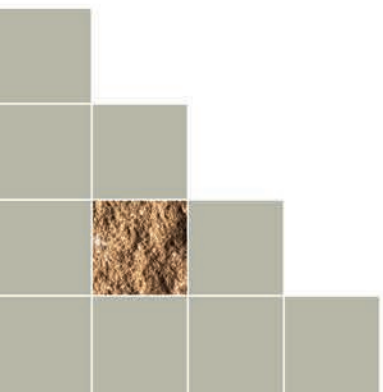

Legend® is the block to use when your project requires a maximum performance retaining wall solution. The extended tail design and core filled vertical "stone columns" unify the grid, backfill and block as one complete structure. Legend is designed to manipulate any slope, confront the demands of any challenging project site and accomplish more.

## Legend® Blocks

Unit specifications, availability, color, and fascia options vary by manufacturer. Please contact your nearest Rockwood manufacturer or dealer for more information.

### Straight Split

**Size:** 8" H x 18" W x 22" D  
**Weight:** 115 lbs.

### Beveled Split

**Size:** 8" H x 18" W x 22" D  
**Weight:** 110 lbs.

## The Advantages of the Legend® System...

**It's Fast...** Located on the underside of each Legend® block, the 4" x 4" Anchor Bar creates an automatic setback with the highest shear resistance in the industry. Plus, Legend's fewer pieces, pinless design, and lower weight per square foot reduces construction time, labor costs, and freight charges.

**It's Simple...** "One Unit" construction is a vital element of Legend's superior design. 90° corners and half blocks are made simply by removing a portion of the block. No special blocks are required; no special inventories are needed; no shortages occur on the jobsite!

**It's Strong...** Upon assembly, Legend blocks automatically create vertical "stone columns". When layered with grid, the gravel filled "stone columns" provide a multi-point interlock, for a more uniform block-to-grid connection.

**It's Versatile...** Variable setbacks, sharp radius turns, "One Unit" construction, and complete interchangeability are all features of Rockwood's Legend System. The ability to mix various sizes and colors within a wall enhances your imagination without sacrificing structural integrity. Plus, the Anchor Bar allows you to build at any setback you desire – from 0° to 14°, providing the only "true" vertical setback in the industry.
